

Dolna Mitropolia, 2022

Contents

Assen Marinov Deducing of deflection angle and expression of the θ-β-M diagram	5
Georgi Yordanov Automatic piloting assessment	10
Radostina Calovska, Stefan Biliderov Synthesis and research of a controller for microclimate stabilization in an automobile based on finite state machines	21
Milen Atanasov Combat use of aircraft with unguided weapons	27
Yoto Georgiev Battery energy storage technology for aviation - An overview	36
Marin Marinov, Velislava Peneva An algorithm optimizing the geometric distribution of the stations in aeronautical multilateration systems	43
Milen Simeonov, Veselka Radeva Detecting and Tracking Asteroids in The International Astronomical Search Collaboration Science Program	58
Nikolay Kanchev Heuristic procedure for optimal structural design of a subsonic aircraft wingbox	70
Konstantin Metodiev Numerical Analysis of Flow around Wing Sections PIL15M825 and PIL12M850	80
Evgeni Andreev, Dimitar Dimitrov Analysis of cyber vulnerabilities in civil aviation and recommendations for their mitigation	90
Vladimir Savov On the phenomenon of a light sphere in an inclined air jet	100
